Oksana Sheiko

QA Engineer | Web | Mobile
Lisbon, Lisbon, Portugal

Summary

Hi, I am QA Engineer based in Portugal. I focus on manual testing of web and mobile applications, including functional, UI/UX, cross-browser, and regression testing.

I create and execute checklists and test cases, report bugs, maintain test documentation, and work closely with developers and PMs to ensure product quality.

I've also integrated Cypress (JavaScript) into my workflow to cover front-end scenarios with automated tests, which significantly optimized my routine checks and improved test coverage.

I care about clean, intuitive products and efficient teamwork. Constantly improving my skills — next step: advanced automation frameworks(Selenium, Pytest, Requests).

Experience

Larixon Classifieds
QA Engineer
December 2023 - May 2025 (1 year 6 months)

Tech Stack:

—Devtools, Postman, Charles, Cypress, JavaScript, PostgreSQL, Redis, DBeaver, Compass, Kafka UI, Jaeger, Android Studio, Firebase, Kibana, BrowserStack, Git, Jira, Test IT, Confluence

Responsibilities:

— Wrote and maintained test cases in Test IT and checklists in Miro based on product requirements;

— Performed manual testing of web and mobile application: functional, regression, integration, UI/UX, cross-browser testing and smoke testing;
— Used Chrome DevTools to analyse network requests, monitoring console errors;
— Tested API in Postman and Swagger — to verify request and response correctness;
— Worked with Postman using environment variables, collections, pre-request scripts, and basic test automation — to streamline API testing and ensure reusability;
— Used Kafka UI to track events and messages in topics — for validating business logic and microservices communication;
— Conducted integration testing between microservices with trace ID using Jaeger;
— Created bug reports in Jira, with a detailed description of the error, screenshots and links to logs from Sentry and Kibana;
— Read log files in Linux terminal Git Bash. Sorting by parameters including logging levels;
— Worked with Postgre SQL and Redis Data bases.   Sent SQL requests to DBeaver. NoSQL requests to Compass and Redis Commander;
— Used Charles Proxy to intercept and modify HTTP requests using Breakpoints and Map Local functions;
— Conducted testing for mobile application using Android Studio and Firebase;
— Worked with documentation in Swagger and Confluence, Figma: reviewed and analysed user specifications and design mock-ups.

Key Achievements:
— Updated all regression test cases and added missing ones, thereby increasing overall test coverage;
— Introduced a test case review culture to improve quality, consistency, and knowledge sharing within the QA team;
— Created and maintained documentation and knowledge base to improve information accessibility and support team collaboration.

Atlantic Empire LDA
Assistant Translator at the Consulate of the Russian Federation in Lisbon
November 2022 - July 2023 (9 months)
Lisbon, Portugal

— Reviewing and editing translations of official documents, letters, certificates, and legal texts from
Portuguese to Russian and vice versa — ensuring adherence to diplomatic and legal terminology
— Preparing documents for consular procedures (registration, issuance of powers of attorney and
certificates, passports and visas, civil status certificates)
— Maintaining client document archives in compliance with confidentiality requirements and strict
data protection standards
— Providing consultation and end-to-end support to clients throughout the process — from initial
request to receipt of the final document
